

AFC-705 Fuel Catalyst

AFC efficiently decontaminates and cleans the fuel and injection system.

AFC-705

Contents	Combustion Catalyst, Surfactant, Dispersant, Corrosion Inhibitor, Lubricity Enhancer
Treatment Ratio	1:5000
8oz Bottle	320 Gallons
1 Gallon Jug	5,000 Gallons
5 Gallon Jug	25,000 Gallons
55 Gallon Drum	275,000 Gallons

Quantity Packaging

8oz. bottles sold individually, 14-bottle tray or 56-bottle case
1 gallon jug sold individually or 4-jug case
5 gallon and 55 gallon sizes sold individually

AFC-705 is available in 8oz. bottles, 1 gallon and 5 gallon jugs and 55 gallon drums.

AFC-705 Fuel Catalyst is a unique and powerful, broad-spectrum fuel additive concentrate. It is designed for use in Diesel, Biofuels, Gasoline, Kerosene and HFO.

Implementing AFC-705 as part of your preventative fuel maintenance program will stabilize your fuel, prevent sludge build-up and eliminate the need for expensive and toxic biocides.

Using AFC-705 accelerates tank cleaning and fuel restoration processes. It enhances the breakdown and removal of sludge, slime and bio-fouling from

tank walls and baffles that are difficult to access. AFC-705 efficiently decontaminates and cleans the fuel and injection system. It continues to work in the tank, cleaning and stabilizing fuel for up to 12 months.

- **Cleans Fuel, Storage Tanks and Injection Systems**
- **Improves Combustion, Lowers Emissions and Fuel Consumption**
- **Removes and Prevents Carbon Build-Up and Corrosion**
- **Adds Lubricity and Extends Lube Oil and Equipment Life**
- **Optimizes Engine and Boiler Efficiencies**
- **Reduces Harmful Emissions, Soot and Particulate**
