

SMART FPS Automated Fuel Filtration Systems keep fuel dry and in “pristine condition” while removing sludge and water from tanks. The DX Series ensures **Optimal Fuel Quality At All Times** providing Peak Engine Performance and Generator Reliability.

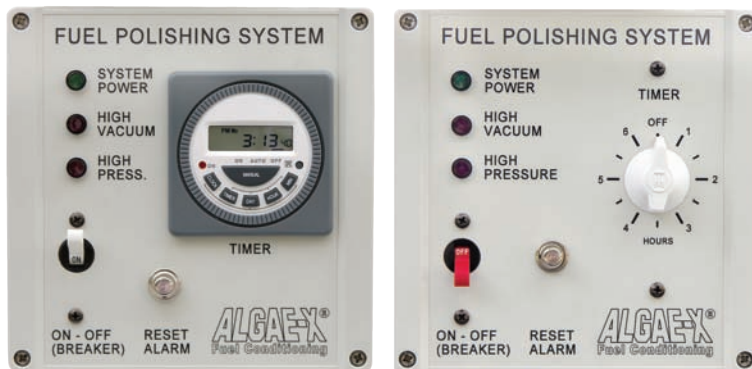

- Fully Automated
- Compact, Light Weight
- Safe & Quiet Operation
- Affordable Fuel Reliability

FPS-DX systems are compact, easy to install, operate and maintain. Water and sediment can be easily drained by opening the valve on the bottom of the filter/separator.

Algae-X fuel conditioners stabilize your fuel and eliminate microbial contamination. DX systems are equipped with vacuum and pressure sensors to monitor and control pump shutdown, alarm and operating functions.

SMART FPS-DX systems eliminate the need for periodic tank cleaning, ensuring “clear & bright” fuel, optimal combustion, and clean tanks.

SMART FPS DX-D
Digital Programmable Interface

SMART FPS DX
Analogue Timer

SMART FPS-DX & DX-D (Digital)	
Control Panel	High Vacuum, Pressure & Power Indicator Lights & Alarm Reset Programmable Digital Interface or Analogue Timer
Flow Rate	80 GPH Gear Pump
Port Size	1/2" Hose Barb* *Other Connectors Available
Power	12V or 24V DC
Weight	20lbs
Dimensions	15" x 18.5" x 7.5" 38 x 47 x 19 cm
Algae-X Fuel Conditioner	LG-X 500
Filter/Water Separator	15 Micron Water Block Filter Pressure Gauge Monitor
Strainer	40 Mesh Stainless Steel
Construction	Powder Coated Aluminum Back Plate & Stainless Steel Plumbing
