

AXI INTERNATIONAL TSC-7000 Touch-Screen Controller

The TSC-7000 Series displays system and alarm status on the industrial control panel (on the door) via indicator light and on the text display on the controller.

TSC-7000 FEATURES:

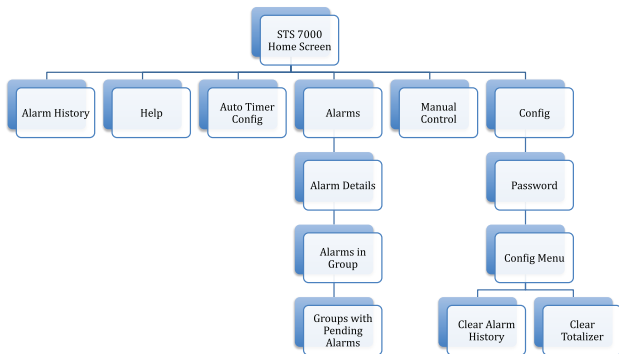

- Modbus, TCP/IP, LAN and Internet Connectivity
- E-mail & SMS Maintenance Alerts
- Maintenance Alert Log File
- Multiple Tank Functionality
- Runtime Totalizer
- Alarm History
- On-screen Help

The 7000 series controller is an HMI PLC UL508A controller with Modbus, TCP/IP, LAN and internet connectivity for more intuitive system setup and monitoring from remote locations.

From the home screen you are able to access the different menus (Alarm History, Timer Configuration, Manual Control, Alarms, Filter Configuration, and Help).

The Alarms menu is able to access the active alarms that are currently triggered. You are able to see in a more detailed explanation of what alarm is triggered. In the Manual Control menu you are able to change between which tanks you are wanting to polish with a multi-tank system. In the Configuration menu you are able to access IP setup and the menu to clear your Alarm History. The Alarm History menu is where you find a log of all the past alarms that were triggered.
